

My Movie Collection

The My Movie Collection starter kit is included with Visual Basic 2005. It is a sample application designed to help you track a movie collection by organizing movies, rating them, and looking up information about them.

1. Start Visual Basic 2005.
2. Select File → New Project. A dialog box is displayed. Select My Movie Collection Starter Kit:

3. Select OK. The Microsoft Visual Basic Starter Kit window is displayed.
4. The Microsoft Visual Basic Starter Kit contains a tutorial on how to use, modify, and customize the MyMovieCollection application. Work through the tutorial. You may want to the print the instructions. Note that if you want to connect your movie collection to the Web and download information about your movies, you will have to download The Web Plus edition of the My Movie collection starter kit. There is no charge to download the Web Plus edition. Also note that there is a link to access other starter kits at the end of the tutorial.
